CITEC Business Solutions

CITEC has a 30 year track record of delivering results working with small and medium-sized businesses across the North Country. We bring world class resources through our state and national network. More information at citec.org.

CITEC
Business Solutions

Your **whole team** needs to think Lean.

Lean Foundations gives your people on the floor the tools they need to understand and actively participate in continuous improvement projects, and maintain the Lean culture you are building in your business.

Delivered by a team of local Lean experts with exceptional credentials who are available to support your organization as you pursue your Lean journey, this program could be included in every employee's orientation.

Participants in the Lean Foundations program are introduced to the base of Lean tools through a combination of classroom presentation, simulations, and group activities during 4-hour sessions held over five consecutive days. Take one week, and get your team all speaking the same language.

The topics covered include a broad introduction to all of the basics your staff need to continuously improve efficiency and quality in your organization.

- Intro to Lean Principles
- 8 Wastes
- Value of Speed (Measuring Cycle Time)
- Current State Value Stream Mapping
- Future State Value Stream Mapping
- Kaizen Leader Training
- Standard A3
- Workplace Organization: 5S & Visual Controls
- Level Production (Heijunka)
- 1-Piece Flow Cells
- House of Lean Summary: TPM, SMED, Kanban, Lean Materials Handling
- Next Steps & Certifications

This program is offered several times throughout the year in locations across the North Country. Contact George Mauch today to find out about the next session near you.
